JANUARY 3, 2021

PART 2: DESTRUCTIVE TECHNOLOGY

SUPERIOR TECHNOLOGY

God the Father, God the Son and God the Holy Spirit have always existed. Thus, all spiritual laws have always existed as well. Spiritual laws govern relationships, obedience, and science. **Isaiah 55:8-11; Psalm 119:89; Matthew 5:17-19**

Sometime in eternity past, God the Father, God the Son, and God the Holy Spirit gathered around a massive supercomputer in the throne room of the third heaven. They wanted to create sentient¹ beings that would choose to love them and this would necessitate endowing these beings with a free will or else it would be a false/artificial love.

The Godhead began by designing everything virtually and running a timeline to see how things would turn out. They wanted a physical universe to exist in a spirit world. They called these creatures “angels” and made them with the ability to operate in the spirit world as well as the physical world.

They saw that Lucifer would rebel and start a space war in the physical universe, the creation of Adam and Eve as a result of Lucifer’s sin, and technology would play a huge role on the refurbished earth. The Godhead was going to send Jesus as the Messiah to the earth and Lucifer would demand that any action the Godhead would take on earth, he would have the legal right to do the same thing.

Jesus was not going to set up a physical kingdom on earth and therefore did not need a high level of technology for its inhabitants. Holy angels were in charge of His security and the Holy Spirit would work on the souls of the people. Jesus did not want a control system; He wanted people to come of their own free will. They would have the choice to stay or to leave. **John 6:59-66; 18:36**

The Godhead ran the virtual time run to the point when Lucifer set up the Antichrist system and realized technology needed to be held back until the Luciferian control system was needed. Electricity would pave the way for developing additional technology on earth and the Godhead set that time to be around 1.5 days (1,500 years) after the resurrection of Jesus.

SCIENTIFIC LAWS

The different scientific laws apply to both dimensions. Mathematics is universal in both systems. While chemistry is based upon mathematics, the chemical laws in the spirit world are different from the chemical laws found in the physical world.

Electricity existed when Adam and Eve were created some 6,000 years ago, but the Godhead did not provide them with information about the matter. After Adam and Eve

¹ Sentient: able to perceive or feel things

sinned and were driven from the Garden of Eden, all they could rely upon was their knowledge of agriculture. **Genesis 2:7-19**

Adam and Eve were instructed by Jesus to begin sacrificing to the Lord. One of the key elements of a sacrifice was fire. Jesus must have shown Adam and Eve how to start a fire, most likely using sticks to generate friction into a hot ember, transfer it into a tinder bundle, and then adding more fuel to the fire.

Abraham lived some 1,955 years later and used a clay pot to carry burning charcoal to the place of sacrifice. **Genesis 22:6**

ILLEGAL TECHNOLOGY TRANSFER

We are told in the sixth chapter of Genesis that fallen angels entered the physical realm in order to pollute the human race. In order to facilitate this destruction, they introduced mining technology from which mankind learned to extract iron and copper from ore and fashion metal weapons. **Genesis 6:1-13**

Let's say we selected 500 adults and transported them to a mountainous wilderness area and told them to locate copper and iron ore deposits. Once they found a suitable location, they were to dig a mine, extract the ore, crush it, and heat it to 1,984°/2,800° Fahrenheit to melt the copper/iron. Coal would be used to produce carbon and mixed with iron to produce steel.

What would be the likelihood of success on such a project? It would be an impossible task because they wouldn't have sufficient knowledge of the process or the necessary equipment to make it happen.

This was the case in the first Book of Enoch when fallen angels crossed over into the physical world and taught a group of humans how to mine ore, melt it, and extract different metals. It is inferred that these fallen angels also introduced the necessary equipment to make this happen since the descendants of Adam and Eve did not possess metallic tools.

God did not instruct Adam and Eve to teach their children to kill each other. The concept of war was ushered in by fallen angels. Once humanity learned to successfully mine and extract the metal, they were taught how to make swords, knives, shields, and breastplates. The fallen angels taught the different family groups how to fight and take dominion over another family clan.

The Godhead put a technological moratorium on Lucifer and his fallen angels in that they were not allowed to introduce the knowledge of electricity or explosives to mankind. Thus all mining carried out involved strip mining the earth's surface or finding iron on lake bottoms.

The fallen angels were allowed to teach humanity how to build ships powered by wind or oars and wagons were drawn by horses or oxen. Mankind was taught how to build a water wheel to produce grinding power.

THE GREAT FLOOD

There were only eight people who survived the Flood of Noah when the waters covered the earth's surface for five months. Noah and his family left the ark where it settled on Mount Ararat in Turkey and walked to the land of Shinar in southern Iraq.

Logic would dictate that Noah and his three sons had seen people bringing the timber for the ark cut by metallic saw blades. They found the ruins of the cities afterwards, including the manufacturing places where tools and weapons had been made. Thus the knowledge existing prior to the flood was preserved, and as the population increased, the different clans – which eventually turned into nations – maintained their knowledge of making weapons and waging war.

WEAPONS DEVELOPMENT

Lucifer and his minions never let up and they continued to show men how to improve their killing methods. As nations began to fortify their cities, the battering ram, catapult, and trebuchet were introduced to breach these defensive fortifications.

Taoism is a religion where people cross over into the spirit world. Chinese shamans in the 9th century A.D. were taught how to mix sulfur, carbon and potassium nitrate to make an explosive which became known as “black powder,” effectively providing the human race with different ways to access the ore found in mountain rock.

Demons showed the Chinese to build the fire lance which was used in warfare in China as early as 1132. It was a small tube attached to a spear and aimed at the enemy in melee² combat. Projectiles were eventually added to the tube, giving it the effect of a shotgun with range of ten feet.

Hand cannons were successfully used by the Muslims against the Mongols in 1260 at the battle at Ain Jalut in Galilee.

The matchlock arquebus appeared in the 15th century and the flintlock musket was introduced in the early 17th century. Firearms grew in popularity and were used by European armies from 1521. They were fired in mass volleys, followed by bayonet charges and used like the pikes (long spears) they had replaced.

European style warfare dictated that lines of men would stand and fire at each other from a distance of 50 to 200 yards. The rifled musket which appeared in the mid-19th century increased the lethal range to 300 yards for the standard soldier and more than 800 yards for a trained sniper.

The era of loading a firearm by pouring black powder into the barrel from the muzzle, followed by lead shot, and rammed down with a ramrod came to an end. The modern centerfire cartridge containing the powder and shot decreased the time needed to fire and reload three shots from sixty seconds to just three.

Hiram Maxim developed a machine gun in the late 19th century. The gun was capable of firing 600 shots per minute and saw use throughout the world.

The Germans were responsible for the submachine guns that came into being in 1918 and the assault rifle in 1944.

² Melee: hand-to-hand fight among several people

The battle tank was introduced in World War I to break the stalemate of trench warfare and alleviate the heavy infantry casualties incurred from the machine guns.

BIGGER, MORE POWERFUL

When the steam engine was introduced in 1698, it started a chain of innovations. The fallen angels influenced men to build warships powered by steam engines. Wooden warships became obsolete and were replaced with hardened steel and long range guns. Demons of war always want bigger and better equipment for killing and eventually the battleships were replaced with nuclear powered aircraft carriers and submarines with enough firepower to destroy a nation.

The discovery of electricity in the 16th century opened the door for a technology which up to this point had been off limits for humanity.

- ❖ The first combustion engine was built in 1798.
- ❖ The first electric motor was built in 1821.
- ❖ The first airplane was built in 1903. Airplanes by 1914 were being used to strafe³ and bomb enemy troops and defend against enemy air attacks.

Evil spirits used electricity to develop weapon systems capable of killing large numbers of people at a faster pace. The fallen angels taught mankind to build the atomic bomb in 1945 and the hydrogen bomb in 1952.

Chemical weapons have been used periodically since the First World War.

All war technology has been transferred from the Kingdom of Satan and a huge transfer took place in 1947 when Lucifer exposed one of his UFO's to the U.S. military. From this crash came the transistor, integrated circuits boards, lasers, fiber optics, computer processors, etc.

This opened the door for humans to build industrial computers, as well as personal computers, laptops, tablets, smartphones, satellites, flat screen televisions, CD's and DVD's, etc.

The modern technology was transferred from the spirit world by fallen angels. When God lifted the moratorium, the floodgates were opened with mankind's harnessing of electricity.

The prophecy from Jesus to the apostle John about the Antichrist and his system could only take place in a society with the technology to support Lucifer's plan for a world federation. God held things back until the end times or humanity would have destroyed itself a couple of thousands of years ago. **Revelation 13:1-18**

All new discoveries have been used by the demons of war to increase the speed and capacity with which men kill each other.

Humanity has never invented anything. For millennia mankind has only improved upon old technology. Nothing really changed until we were allowed to discover electricity. That means the forms of modern technology have always existed and are common in

³ Strafe: to rake (ground troops, an airfield, etc.) with fire at close range and especially with machine-gun fire from low-flying aircraft.

the spirit world. I don't think it would be improbable to say that they have even devices in the spiritual dimension which we know nothing about.

Jesus told the apostle John that all unsaved people will be resurrected with a shameful body at the end times. People saved during the thousand-year kingdom will also be at this judgment. Jesus stated that there are two sets of records, books where every deed and thought of a human being is recorded, and the Book of Life. **Revelation 20:12**

Automobiles prior to 1980 did not have computers. When a car broke down, it was taken to a repair shop and the driver had to tell the mechanic what led to the breakdown. The car was manually examined until the source of failure was found.

It is much different today when you bring in your car to a repair shop with a check engine light. The car is connected to a computer, which reads the diagnostic code from the onboard computer, and in just a few seconds, the mechanic knows the source of the problem.

Every human being has a soul that is eternal once it is created. The soul consists of a spiritual body and a head with a soul brain. It is with this soul brain that mankind thinks and reasons. The data is transferred to the physical brain, which in turn activates the physical body to do a specific task such as talking, singing, looking, learning, walking, etc.

The soul brain has the ability to think and reason and retains all our memories. Each event carried out by a person is recorded in the soul brain. On judgment day, Jesus will simply connect the soul brain to a computer and that person's entire life will be displayed with sound and thought.

With our current technology, mankind has been able to send probes to Mars and other planets. The United States was able to achieve a moon landing in 1969 and astronauts walked on the surface of the moon. The Hubble Space Telescope allows humanity to see far into our universe and our understanding of the cosmos is vastly different in comparison to the people living on the earth at the time of Jesus. The more mankind learns, the more the Bible is proven to be true.

God sent an angel from the third heaven some 2,550 years ago with a message to the prophet Daniel. But a powerful fallen angel who ruled the sky over the Persian Empire refused to let the holy angel pass. The holy angel was stuck above the atmosphere for 21 days until God sent Michael and a large detachment of angels, who attacked the fallen angel and his forces, and opened a path for the messenger angel to descend to the surface and speak to Daniel. **Daniel 10:1-14**

One of the last things the angel told Daniel was that knowledge would increase toward the end of times and each person living today can attest to that. **Daniel 12:4**

Remember, it's not so important how you begin your life after salvation, but how you finish it!

Do you have an ear to hear with?
