

[Editor's note: There are cures that the American Medical Association and bio-pharmaceutical companies don't want you to know about because there isn't any money to be made. They are not looking for cures, only treatments which can be sold for a profit. Most doctors have no education in alternative medicine and therefore are not culpable since natural healing remedies are not being taught at medical schools. The adage is true: if you don't know that something exists, you are not going to look for it.]

The following is an excerpt from Dr. James Walker's book, "Holocaust American Style," pages 164-169.

STROKES, CAUSED BY BLOOD CLOTS

Strokes are the third biggest killer in the U.S. They cause over 160,000 deaths a year. Also, they are the primary cause of serious disabilities. March 30, 1998, U.S. News magazine reported that strokes "are leaving 3 million people annually unable to work or take care of themselves."

Dimethylsulfoxide (DMSO) is one of the world's greatest solvents. It is a byproduct of the paper industry. When the industry breaks down trees to make paper, they get about 25 different chemicals from the wood. DMSO is one of them. It was discovered in the late 1800's by a Russian scientist.

DMSO has not been found unsafe for humans. Any side effects are merely minor irritations. If it is rubbed on the skin, it may cause a slight stinging sensation. It imparts a smell to your body which some people find unpleasant, but will last for only about 3 days. This can be reduced by adding a few drops of Peppermint Oil to your mixture.

The molecules of DMSO are so small that they will drop through the pores of your skin and enter your blood stream, almost immediately.

DMSO stops bacterial growth. It relieves pain. As a vasodilator, DMSO enlarges small blood vessels, increasing the circulation in an area. It softens scar tissue and soothes burns. When gently painted on burns with a soft bristle brush, it stops the growth of bacteria and lets your body cure the burned skin. DMSO's anti-inflammatory activity relieves the swelling and inflammation of arthritis, bursitis, tendinitis, and other musculoskeletal injuries. Refer to Dr. Morton Walker's book titled, "DMSO Nature's Healer," for many other uses and advantages of DMSO.

If given soon after a stroke is first recognized, and it is caused by a blood clot, DMSO can dissolve the clot and stop the effects of the stroke. Thus, it restores normal blood circulation and avoids paralysis.

I repeat for emphasis.

Some time ago, I was awakened from a deep sleep, by a painful thumping in my left leg between my knee and ankle. I recognized it as a blood circulation problem, i.e., a blood clot in the lower part of my leg. I turned on the light and looked at my leg. I noted that every time my heart beat, my skin was pushed out and pain accompanied it. I immediately painted some DMSO on the skin of my lower leg. After about 10 minutes, the pain had reduced, but some pain and thumping still remained. I waited for about 1 hour.

Then, I went to our kitchen, poured about 8 ounces of orange juice (it can be any fruit juice), and mixed in 1 ounce of full strength 99.7% pure DMSO, and 5 drops of Peppermint oil. This was at 5 am in the morning.

I sat on the side of our bed, and on an empty stomach, sipped it slowly and swished it around in my mouth. This let some of it go through the skin directly into my bloodstream. Then I swallowed it. In my stomach, more of it went through the wall of my stomach directly into my bloodstream. I consumed all of the mixture in about 6 minutes.

Within 12 minutes, all pain and thumping was gone. This formula and procedure had cured my circulatory problem caused by a blood clot, i.e. dissolved the clot.

So, within 12 minutes and at the cost of about one dollar, I had cured a stroke or heart attack. I had no side effects or paralysis.

But, how soon should it be administered? Dr. Stanley Jacob, a leading expert on DMSO, says within the first few hours. One of his patients had a stroke at 7:30 AM, and refused to go to a hospital until his wife had spoken to Dr. Jacob. She didn't get to talk to Dr. Jacob until 6:30 PM, a delay of 11 hours. Starting at 7:00 PM, the day of the stroke, 11:30 hours later, she gave him 1 teaspoon of 50% DMSO in a little orange juice

every 15 minutes for 2 hours, and then every half hour for 2 hours. The next day, her husband was fine, with no side effects. The doctors didn't even get a chance to kill him.

Last night, I was awakened around midnight by a very painful thumping and cramping in the muscles of my right leg between my knee and ankle. I got up, walked around, exercised my leg, and tried to get rid of the painful thumping and cramps. Nothing worked. Then my left leg started doing the same thing. This went on for about 20 minutes and was getting worse, if that was possible. Then I went to my bath room, pulled out my bottle of DMSO and my little ½ inch soft-bristle artists brush. I painted the DMSO on the muscles of each leg and let it soak in. Then I painted the DMSO on again. Within about 4 minutes, all of the pain and cramps were gone. I was back to normal, and went back to sleep. And, FDA has declared DMSO outlawed in the U.S.A. on humans.

DMSO seeks out water. With your blood being 90% water, the DMSO will run to the blood, thus dissolving any blood clots.

Once DMSO gets into your body, by dabbing it on your skin, given I.V., or by mouth, it penetrates your body and crosses the blood-brain barrier. So, even given orally, it can dissolve a blood clot regardless of where it is located. A substance that can stop a stroke or heart attack in a few minutes while it is happening, is something you may want to keep in your medicine cabinet.

DMSO has *not* been found to be unsafe for humans. Any side effects are minor irritations. Two main side effects are a slight stinging on your skin if you rub it on (dab it on) which will last a few minutes, and the smell that can be reduced by adding 5 drops of

Peppermint Oil to each ounce of DMSO. It relieves pain in general, especially the pain and swelling from wasp and other insect stings. As a vasodilator, DMSO enlarges small blood vessels, increasing blood circulation into the area and from the area which carries away toxins and debris. Also, it softens scar tissue and soothes burns.

DMSO's anti-inflammatory activity relieves the swelling and inflammation caused by arthritis, bursitis, tendinitis, sprained ankles and knees, strained muscles, and other muscular-skeletal injuries. On burns, it almost immediately relieves pain, reduces blistering, if any, and returns your skin to its original look. It does many more good things of a therapeutic nature for anyone who is injured or ill.

Remember that FDA has declared DMSO as not allowed to be used on humans.

The real reason is that it works and does so many good things, that it competes with their FDA buddies in the Medical Cartel.

You can buy DMSO at your local farm feed store or tack shop for around \$6.50 a pint (16 ounces). Be sure that it is 99.7 or 99.9% pure. At your health food store it will cost around \$25 a pint. At your pharmacy it will cost around \$30. You can buy medical grade DMSO for about \$60 per pint, but that is not necessary. It is overkill.

Get DMSO and use it at your own discretion. Don't let those deadly corrupt nitwits at FDA stop you from naturally healing yourself. Again, I highly recommend that you buy Dr. Morton Walker's book titled "DMSO Nature's Healer" referenced in Chapter 5 above. He shows you several formulas and doses to be used on several other illnesses.

Recently we received our April copy of Reader's

Digest. Accompanying it was a 16 page Supplement, Viewpoints on Health. This separate booklet was an advertisement for the Drug Plavix. It was published as an educational service by Bristol-Meyers Squibb/Sanofi Pharmaceuticals Partnership.

They ask for comments, so I gave them some comments as follows:

"I noted the following paragraphs on page 2: "Clots: The Underlying condition Most strokes and heart attacks are caused by clots that reduce or block the flow of blood from getting to your brain or heart."

Also I noted 3 other such paragraphs on page 6, one quoted as follows: "Plavix is proven to help keep platelets from sticking together and forming clots, which helps keep your blood flowing. This can help reduce the risk of a future stroke or heart attack."

And, I noted that there are severe side effects, mix restriction with other drugs, and Plavix is not for everyone, according to the pamphlet.

I checked with a pharmacist relative to Plavix. She told me it costs \$145.99 plus a physician's prescription fee, which I assumed to be around \$50. Also, this was for 30 pills- that is a 1-month supply to help prevent formation of blood clots. This would cost about \$195.99 each month for a total of \$2,351.88 each year, to clear all blood clots and help prevent strokes and heart attacks. On top of that, there are several possible severe side effects using Plavix, it should not be mixed with certain other drugs, and certain people should not use it.

This is the remedy offered by the Medical Cartel, approved by FDA, and condoned by our Congress.

Then I gave them this comparison to consider. (By now, you know where I'm going with this, and I quote

from my comments to them).

“For several years, I have been using my own very simple formula using only 3 non-toxic natural ingredients, from God’s own pharmacy, to keep blood clots dissolved, and as you say, help prevent strokes and heart attacks.

“Recently I have been too busy on a special project and ignored my own periodic blood clot preventive measures. After several months, it happened.

“I had been doing some work around our home that required me to lie on my left side and hold up my head for about 4 hours, stressing my neck muscles. So, I expected my neck muscles to ache for several days, and they didn’t disappoint me.

“Two days later, my wife and I were going to Church. As we approached an intersection, I had to turn my head to the left to clear traffic. My head was frozen in place, and would not turn to the left, forward and to the right OK, but not turn to the left. As I tried to turn my head to the left, the blood vessel leading up to my brain on the left, was very painful. In Church, the same situation was prevalent. Then I suspected it was not my sore neck muscles, but I was over 2 hours into a stroke. I did not panic or get in a big hurry because I knew that I could cure my stroke.

“On our way home, we passed the hospital. I would not go in and let them kill me. This option was not to my liking.

“While my wife and I were sitting in our living room talking, she asked me to not get up, but look and see if the TV Guide was on the dining table. I tried to look left. The blood vessel leading up to my brain on the back left side was very painful, and the left side of my neck was paralyzed. Now I realized for sure that I was over 3 hours into a stroke. (No big deal).

“I went to our kitchen and mixed my 3 non-toxic natural ingredients from God’s own pharmacy. Then I went to our bedroom and sat on the side of our bed sipping and swallowing the formula. Within 6 minutes, my body had consumed the whole 9 ounces. Then, within 12 minutes all of the pain and paralysis had stopped, and I could turn my head to the left perfectly normal with no pain or restrictions.

“So, within 12 minutes and at a cost of less than ONE DOLLAR, I had cured my stroke at home with my own non-toxic natural formula from God’s own pharmacy, which had no side effects, will safely mix with any other ingredients, and is suitable for anyone.

“I have had NO consequences such as paralyzed and dropping facial or neck muscles, or limited activity in my arms. Again, I am perfectly normal for a 91-year young geezer and as active as a frisky puppy under a leaky cow.

“Now to keep from having a heart attack or stroke, I am back on my regular periodic treatment of 9 ounces of my own non-toxic natural formula, from God’s own pharmacy, every 6 weeks, at a cost of less than one dollar each treatment.

“So, on an annual basis, that toxic Plavix with its serious side effects costs around \$2,400. My own non-toxic natural formula with no side effects costs around \$8 annually. And those corrupt pinheads in Congress say they are trying to lower drug costs. Why can’t this type of proven curative process be made available to the American people now?”
